Note to Patient: Document Type CCDA is an older format that contains limited information about your visit. The information in a CCD will likely not change from one visit to the next. This is not a problem.

The newer CCDA format will contain more information about your visit, however it will only be available for more recent visits.

Reason for Visit

Ho Sun Choi presents with/for significant distance and blurry vision located in OD/OS that has been occurring intermittently for 6 months, usually in the PM and when watching TV. This condition is associated with redness and foreign body sensation and burning. 1 year, pain/discomfort/redness/tearing, worse with computers. All helps a bit.

Problems
